

Blue Carbon: Charting the Path for Governance and Partnerships

Thursday 30 June | 13:00 - 14:15 WET
Altice Arena, Main Committee Room

About

As blue carbon holds great potential as an ocean-based solution to climate change while also generating a broad array of co-benefits, it requires good governance and cross-cutting partnerships to ensure credible long-term project results that engage with best practice principles for a blue carbon market that is sustainable and equitable. It also requires attention to the co-benefits through a process that while valuing carbon removal benefits, delivers on the broader benefits of rebuilding blue natural capital embedded in blue carbon projects.

Speakers

- Ambassador Peter Thomson, UN SG Special Envoy for the Ocean & Friends of Ocean Action Founder
- Mr. Luhut Binsar Panjaitan, Coordinating Minister for Maritime Affairs and Investment of the Republic of Indonesia
